

## The Whizz Loop - HF/VHF

The Whiz Loop is ideal for QRP Transceivers when space is limited or using portable with a Yaesu FT-817ND or similar. Can be used indoors with surprising results and handy for travelling due to its "pocket" size

### Specification

- TX: 14-50 MHz
- Power: 10W Max AM/CW/SSB
- Width: 40cm
- Connection: PL259

### Instillation Instructions

- Simply open the supplied copper loop and attach one end to each of the terminals on the Whizz Loop
- Then connect the Whizz Loop directly to your transceiver or other mounting method you may chose to use
- Set the desired band on your transceiver to match that of the Whizz Loop and you are ready to play
